

Using ScriptPass in Your Practice

iCare+

Two ways your patients can save up to 80% on prescription costs

1

ScriptPass Savings Card

Share a ScriptPass prescription savings card with your patients, then instruct them to show it to the pharmacist at the drop-off window. ScriptPass Savings coupon available on ScriptPass.com

2

ScriptPass Website

Have your patients visit scriptpass.com. They can compare prices across local pharmacies in real time and send and receive free coupons right to their phone.

Why ScriptPass?

If your patients are under or uninsured, ScriptPass can help them better afford their medications. However, even if your patients have insurance, ScriptPass may beat their insurance copay.

Saves time on prior authorizations

If a patient's insurance is asking you to initiate a prior authorization for a generic medication, check the cash price on ScriptPass first. The price may be more affordable and save you and your patient time.

Provides access to medications not covered by insurance

If expensive generic medications are not covered by insurance, patients might find a more affordable cash price using ScriptPass.

Other ways to use ScriptPass in your practice

Write a 90-day prescription

90-day prescriptions are often less expensive and promote better adherence than a 30-day prescription. If a patient's insurance plan won't cover a 90-day prescription, they can fill it using ScriptPass instead.

Send coupons securely

You can text or email a ScriptPass coupon to a patient without sharing your contact information. Simply visit the app or website, click on the coupon you wish to share, and follow the instructions. Your patient will immediately receive the coupon, and your phone number and email address will not be shared.

Write prescriptions for over-the-counter medications

Even if a medication you are suggesting is available over the counter, consider writing a 90-day prescription for it. In many cases, your patients can use ScriptPass to save on the over-the-counter price.

Key Takeaways

- ScriptPass can save your patients up to 80% on prescription costs.
- ScriptPass can be used with a physical savings card, or through coupon sent via SMS or email through ScriptPass website.
